TYPE	**QUESTION**		**ANSWER**
Role	What is your role?		Web Designer
Problem Statement	What is the toughest part about your job?		It is a hyper remote control work, and I use skype to communicate with my colleagues. Oftentimes, I have time conflict with the team meeting, and have to ask the team leader for the meeting note and then work on my part. A technical toughest part about my job is interface decoration/design because I have not taken any design class yet.
Goals	What are your overall career goals?		Web Developer/UX Design
Process	How do you plan on fulfilling these goals?		I plan to continue studying scripting languages, such as HTML, CSS, and PHP. And then I hope I can get an offer on Web Desginer/Developer.
Success	How will you measure success in attaining these goals?		I can ask some users how they like my web page on a survery.
Obstacles	What obstacles do you see in attaining these goals?		Lack of skills: I do not have much/enough experience on back-end design. Secondly, it maybe understanding of what a client looks for on a project.
Features	If you were to create a portfolio site, what are some features you think would add value to it?		Related contents, animation that reacts with users.
Expectations	What would you expect from seeing a portfolio site?		Personal picture, description, and contact information.
Concerns	What concerns, if any, would you have by using a portfolio site?		Clearness: make sure it shows clearly on different devices.

TYPE	QUESTION	ANSWER
Role	What is your role?	Game Programmer and Backend Software Engineer
Problem Statement	What is the toughest part about your job?	Creating backend that fits the team's needs and requirements, while programming in the most secure and quickest way.
Goals	What are your overall career goals?	Make over 6 digits, buy my own house, own several cars for fun, and find a wife.
Process	How do you plan on fulfilling these goals?	Helping my startup company attain its goals by providing it a strong server backend and solid game programming.
Success	How will you measure success in attaining these goals?	It depends. I measure the goals by seeing how well the company is doing and how popular we are getting.
Obstacles	What obstacles do you see in attaining these goals?	Attaining these goals depends on the entire team and a bit of luck. Marketing and public relation also plays a major role in attaining these goals. It's a team effort and requires everyone to be top notch.
Features	If you were to create a portfolio site, what are some features you think would add value to it?	Contact Me page that lets the user email you or send you a message. Also, pages with your project demo or videos is useful.
Expectations	What would you expect from seeing a portfolio site?	About Me, Projects, Resume, Contact
Concerns	What concerns, if any, would you have by using a portfolio site?	Sometimes a person's profile might just highlight their best points, or it may be overglorified. This leads to a false impression and can be tricky to sort out the "real" person from their profile.

TYPE	QUESTION	ANSWER
Role	What is your role?	Student IT Technician
Problem Statement	What is the toughest part about your job?	Finding out what is wrong with a computer, whether it be a virus, hardware failure, software bug, or a user error.
Goals	What are your overall career goals?	My main goal is to work for a video game company either doing game design or working as part of the IT team.
Process	How do you plan on fulfilling these goals?	I hope to fullfill these goals by working on video games or learning more about IT practices to gain experience to be hired.
Success	How will you measure success in attaining these goals?	When I am hired by a company I am interested in working at for a career.
Obstacles	What obstacles do you see in attaining these goals?	Lack of experience in the field.
Features	If you were to create a portfolio site, what are some features you think would add value to it?	Link to resume, description of oneself, picture of oneself, experience in various fields, list of skills.
Expectations	What would you expect from seeing a portfolio site?	I would expect a general view or representation of the skills, past experience and possibly personality of the portfolio site owner.
Concerns	What concerns, if any, would you have by using portfolio site?	If I had a concern about using a portfolio site, it'd be that there's too much personal information on the site itself. If it were for me as an employer looking for employees, I'd think there isn't much that would concern me about a portfolio site. If I see that the applicant has applicable skills, then I would be more likely to schedule an interview with them.

TYPE	QUESTION	ANSWER
Role	What is your role?	IT
Problem Statement	What is the toughest part about your job?	When the school has major tech projects, we get really busy and the work is usually a lot of labor.
Goals	What are your overall career goals?	To make money for college and to gain office work experience.
Process	How do you plan on fulfilling these goals?	Show up to work and do the work.
Success	How will you measure success in attaining these goals?	I look at my paycheck. If it's not as high as I'd have liked, then I've moderately failed.
Obstacles	What obstacles do you see in attaining these goals?	Mainly personal sickness and school keep me from working as many hours as I'd like.
Features	If you were to create a portfolio site, what are some features you think would add value to it?	Every possible way to contact me. Every possible project that I've ever done. Plenty of pics to go with those projects.
Expectations	What would you expect from seeing a portfolio site?	Same as features.
Concerns	What concerns, if any, would you have by using a portfolio site?	Not enough information. Spam and viruses.
